Dahua 9MP Radar Video Camera

#### **System Overview**

With its high-performance AI processor, 9MP All-in-one IR AI Traffic Camera delivers high quality images even in the toughest weather conditions. For monitoring, it uses deep learning algorithms and GS-CMOS image sensors with a wide dynamic range and a high frame rate, making it ideal for traffic scenarios. The IR illuminators supplement light when the camera captures license plates without using the external flashing light or strobe, significantly reducing light pollution. A radar is also built into the device, allowing it to measure vehicle speed and sense data from a wide range of perspectives. For network transmission, the device only requires a single 4G card, eliminating the need for network cables.

#### **Functions**

#### Wireless 4G

The camera works with just a 4G card, eliminating the need for network cables. It is powered by its embedded high-performance 4G mobile network module, which also allows the camera to be added to the platform for remote control through auto registration, where it can then be used to transmit traffic violation data and ANPR data to the platform.

#### **Reduced Light Pollution**

The IR illuminators supplement light when the camera captures license plates without using the external flashing light or strobe, significantly reducing light pollution.

#### **Ultra-high Frame Rate**

Uses traffic-specific, high-performance GS-CMOS image sensors with a wide dynamic range, high frame rate, and high signal-to-noise ratio, displaying realistic video images in the day and night. This makes it ideal for traffic scenarios.

- · GS-CMOS image sensor.
- 4096 × 2336@50 fps.
- · Video compression standards: H.265, H.264M, H.264H and MJPEG.
- · Works in poor lighting and does not smear.
- · High-speed capture.
- · A camera, illuminator, radar and more combined in one.
- IP66.
- 850 nm IR illumination
- · 4G mobile network module.
- Under recommended installation and lighting conditions:
   Capture rate >99%

LPR accuracy >98%.

#### Video Metadata

Deep learning algorithms and a high-performance AI processor allow the camera to detect and extract metadata on motor vehicles and nonmotor vehicles, providing a reliable data source that can be used in making effective decisions.

#### **Applicable to Various Road Scenes**

Ideal for scenarios where license plate recognition is needed, the camera is capable of capturing more than ten different types of traffic violations, and supports traffic information collection and event detection.

#### **Multi-dimensional Data Sensing**

GPS positioning is supported, and used in time synchronization. A radar is also built into the device, allowing it to measure vehicle speed and sense data from a wide range of perspectives.

#### Safe and Reliable Performance

Built to withstand the toughest conditions, this camera functions in a wide temperature and voltage range. It is designed with an IP66 case, which protects the camera and its internal components, such as the radar and illuminators, from receiving damage. Feel safe using it in all-weather types.

#### Scene

The camera is ideal for use in intelligent traffic management and for smart city businesses. It is capable of detecting traffic violations, capturing license plates, generating passing vehicle records, collecting traffic data, and detecting events.

Technical Specificati	on	Auto Registration	Yes	
Camera			Intelligence	
Image Sensor	1.1" GS-CMOS	Target Detection	Motor vehicle; motorcycle	
Shutter Mode	Single shutter; Double shutters; Three shutters	-	Detects the driver and front-seat passenger of motor	
Electronic Shutter Speed	Auto/Manual 1/50 s–1/100,000 s	Face Detection	vehicles, and motorcycle drivers; extracts face images	
Noise Reduction	3D NR	ANPR	Adopts developed algorithms to recognize license plate numbers and letters	
S/N	48 dB	Vehicle Type Recognition	Vehicle head: SUV, Large bus, sedan, light truck, pickup, heavy truck, medium truck, van, medium bus, MPV Vehicle tail: SUV, large bus, sedan, light truck, pickup, heavy truck, medium truck, van	
WDR	120 dB			
Minimum intensity	0.001 lux			
Day/Night	Supports ICR auto switch: IR cut-off filter (IRCF) with the polarizing filter is used during the daytime, and switches to the IR transmitting filter at night	Vehicle Color Recognition	White, pink, black, red, yellow, gray, blue, green, orange purple, brown, and silver gray (color recognition is not supported during the nighttime)	
IIIIIminator '		Accuracy (under recommended	Capture rate > 99%;	
Illuminator Number	16	installation and lighting conditions)	LPR accuracy > 98%;	
IR	850 nm		Vehicle head mode: Acura, Alfaromeo, Ashokleyland,	
Illumination Distance	23 m-50 m (75.46 ft-164.04 ft) (adjustable brightness)		Astonmartin, Audi, Baic, Bently, Benz, BMW, Buick, BYD, Cadillac, Chery, Chevrolet, Chrysler, Citroen, Dacia, Daihatsu, Datsun, Dodge, DS, Ferrari, Fiat, Force, Ford, Foton, Geely, GMC, Greatwall, Hino, Honda, Hyundai, Infiniti, Isuzu, Iveco, Jac, Jaguar, Jeep, Kia, Kinglong, Land, Lexus, Lifan, Lincoln, Mahindra, MAN, Maserati, Mazda, Mercury, MG, Mini, Mitsubishi, Nissan, Opel, Peugeot, Porsche, Renault, Rollsroyce, Saab, Scania, Sea Skoda, Smart, Subaru, Suzuki, Tata, Tesla, Toyota, UD,	
IR Covered lane	Center mount: 4 lanes Side mount: 3 lanes	Vehicle logo		
Radar		· ·		
Central Frequency	24.05 to 24.25 GHz			
Measurement Accuracy	±2 km/h		Volkswagen, Volvo	
Velocity Range	5 to 300 km/h		ANPR mode: Wrong-way driving, overspeed, driving slow, crossing the solid white line, crossing the solid yellow line, illegal lane change, not wearing seatbelt, calling while driving, smoking while driving E-Police mode: Running a red light, overspeed, wrongway driving, crossing the solid white line, crossing the solid yellow
